

HELP ANTHONY RECOVER AND GET BACK TO WORK AFTER HIS ACCIDENT

My name is Anthony Martinez, and last Friday, November 6, 2026, I was involved in a serious accident in the Houston area that left me injured and unable to do the work I depend on to support myself.

I had just purchased a bike earlier that day and was heading back with friends when the accident happened. I was taken by ambulance to the hospital, where I was treated for injuries to my hand, neck, and knee.

I suffered three broken fingers, along with a neck injury and an injury to my right knee. I still need an MRI to determine the full extent of the damage to my knee.

I am self-employed and work as a mechanic throughout the Houston area. I have built a following on TikTok by sharing the work I do.

Being a mechanic means I depend on my hands every single day. With multiple broken fingers, even the most basic parts of my job have become difficult. My knee injury has also made getting around harder, and until I know what the MRI shows, I do not know how long it will take before I can fully return to work.

I live on my own with my dog and cat, but I am fortunate to have a large family around me. My mother, my thirteen nephews and nieces, my friends, and the people I have met through the riding and automotive communities are an important part of my life.

I am usually the person who is willing to help someone else and the last person who wants to ask for help. Right now, though, I have to focus on healing and getting back to the work that supports me.

Funds raised through HelpVy will help with my medical and everyday living expenses while I recover, complete the additional testing I need, and work toward getting back on my feet and back to work.

If you are able to donate or share my story, I would be incredibly grateful.
