

HELP JACK RECOVER AFTER A HIT-AND-RUN LEFT HIM FIGHTING TO WALK AGAIN

My name is **Jack Moss**. On **April 7, 2026**, I was riding my motorcycle in **Albuquerque, New Mexico** when an SUV crossed into my lane, hit me, and **kept going**. No stop. No help. Just gone.

The impact threw me approximately **100 yards** from my bike. Someone nearby had a **dash cam** and caught the whole thing — but in that moment, none of that mattered. I was on the ground, unable to move, waiting for help to arrive.

I was rushed to the hospital where I underwent **two surgeries on my right leg**. I spent **five days in the hospital** and I'm now facing a recovery that's going to take everything I've got. I'll be **bedridden for the next two weeks**. After that, I'll need **physical therapy just to learn how to walk again**. My **right hand can barely lift anything**, and my **right leg has very limited mobility**.

I won't be able to return to work for **several months**. That's several months of medical bills, rent, food, and everyday expenses with no paycheck coming in.

I'm not someone who asks for help. But I have no choice right now. Every dollar raised goes directly toward my **medical expenses and living costs** while I focus on getting back on my feet — literally.

If you can give anything at all, it means more than I can put into words. Thank you.

— Jack Moss ☐☐
