

HELP JOHN RECOVER AFTER DEVASTATING INJURIES

My name is Christina Hernandez, and I am organizing this HelpVy campaign for my 20 year old nephew, John Mitchell, after a devastating accident on October 14, 2026.

John had just left his grandfather's house and was on his way to work. Less than five minutes later, we learned he had been seriously hurt. We rushed down the street, and what I saw when I arrived is something I will never forget.

John is still in the hospital and has already undergone 4 surgeries, with more surgeries, treatment, and an incredibly difficult recovery ahead.

His injuries are extensive. John suffered a crushed and severely damaged left foot with torn tendons and ligaments. Part of the bike went through his foot, the tissue began dying, and the foot remained dislocated despite extensive medical treatment. Doctors have warned that there is still uncertainty about whether his foot can be saved and what his ability to walk will look like in the future.

John also suffered four broken fingers on his left hand, a broken left hand and forearm, fractures to his right arm and hand, a broken left leg with injuries involving his knee and shin, and deep lacerations to his left thigh, his left arm, right arm, and across his back. He now has plates, screws, and other hardware in both arms and hands.

The physical injuries are only part of what John is facing. At only 20 years old, he is trying to process the possibility that the life he knew before this accident may look very different.

Before this happened, John was hardworking, independent, outgoing, and determined. He has worked at Andele's Dog House for about a year and a half, including while finishing school. Even immediately after the accident, one of his first concerns was making sure someone called

his job.

John is also a huge animal lover and loves riding with Fellow Motorcycle Friends. He is the kind of young man who would give someone the shirt off his back. He is always willing to help others and has never been comfortable depending on anyone else.

Funds raised through HelpVy will help with John’s medical and everyday living expenses while he remains hospitalized and faces what could be a very long recovery.

Right now, John needs all the help we can give him. If you are able to donate, please consider helping him through the surgeries, medical care, lost income, and long recovery ahead. Every donation, no matter the amount, will help ease some of the financial pressure so John can focus on healing. If you cannot donate, please share his story with others who may be able to help. Our family would be deeply grateful for every person who stands behind John during this fight.
