

HELP ROWAN AND SHION RECOVER AFTER A SERIOUS ACCIDENT

Last **Wednesday**, **October 21, 2026**, Shion and I were riding home after running errands in New Orleans when we were involved in a serious accident that left both of us injured and unable to work.

My name is **Rowan Martin**, and I was riding as the passenger when our motorcycle was struck and we were thrown to the roadway.

I suffered **severe road rash, bruised bones, and significant pain in my neck and shoulders**. The pain has made it difficult to move normally.

Shion was also injured. He has a **deep gash on his leg, and his left ankle is swollen, badly bruised, tender, and painful to walk on**. We are especially worried about his ankle because we have not yet been able to afford to have his injuries fully evaluated by a doctor.

Before this accident, our motorcycle was much more than transportation. **It was how we earned our living.** Shion and I both work as independent contractors with **DoorDash, Uber Eats, and other delivery services**. Between our injuries and the damage to our motorcycle, we have suddenly lost our primary source of income.

We had also been looking at joining **T4T Homoto Rally**, a nationwide motorcycle community involved in volunteer work and helping people in need. Riding was becoming more than just work and transportation for us. It was also becoming a way to connect with a community.

The financial impact is already becoming serious. We are trying to find a way to cover the medical care we both need.

Shion and I are fairly private people with a small, close circle of friends, so asking others for help is not easy for us. But right now, we truly need that support.

Funds raised through HelpVy will help with **our medical and everyday living expenses** while we recover and work toward getting healthy, repairing our motorcycle, and earning an income again.

If you are able to donate or share our story, please help us get through this difficult time. Every donation and every share can make a meaningful difference for us while we work toward getting back on our feet.
