

## HELP TOM AND SHANNY RECOVER AFTER THEIR SERIOUS ACCIDENT

On **September 15, 2026**, my wife Shanny and I were involved in a serious motorcycle accident while traveling in Virginia. In a matter of seconds, everything changed for our family.

We were both taken to the hospital, but Shanny suffered the most serious injuries. Her **femur was fractured**, requiring surgery to place a **titanium rod and screws** in her leg. She also suffered **multiple broken ribs** and spent several days in the hospital before finally being released.

She's home now, but recovery is going to take time. Doctors have her using a walker and want her up and moving, but even the simplest things are difficult right now.

I was fortunate to avoid the same level of injury, but I still suffered **road rash, significant bruising and soreness, and a sprained ankle**.

Through everything, we keep coming back to the same truth: **the Lord had His hand on us that day**. This accident could have ended so differently, and we're incredibly thankful that we're still here together.

Shanny and I have been married for **25 years**. We've been blessed with **three amazing children, a grandson, and several other young people who have come to see us as family and parents in their lives**. Family and faith have always been at the center of who we are.

We're members of **One City Church in Beaumont, Texas**, and I'm also part of the **Bikers for Christ Beaumont Chapter**. Our faith and community mean more to us now than ever.

We're usually the people trying to help others, which makes asking for help difficult. But with Shanny facing a long recovery, we know we can't do this alone.

Funds raised through HelpVy will help with **our medical and everyday living expenses** while we focus on healing and getting Shanny back on her feet.

If you're able to donate or share our story, our family would be deeply grateful.
